VBZ Züri Linie · Rhätische Bahn · Leipziger Verkehrsbetriebe · VAG · SWE EVAG
JUNGFRAU TOP OF EUROPE · MAINZER MOBILITÄT · thurbo Die Regionalbahn. · BLT · rnv
WIENER LINIEN · DVB · BOGESTRA · SSB · VVO

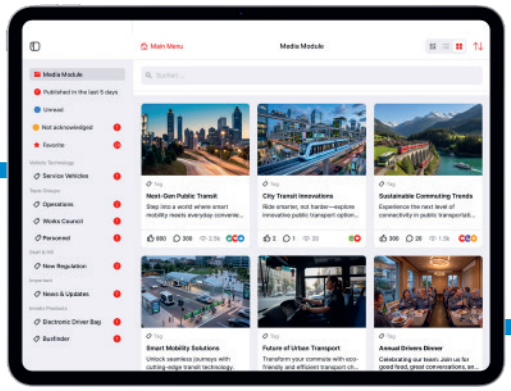

Driving Roster

All information about service and route overview at a glance.

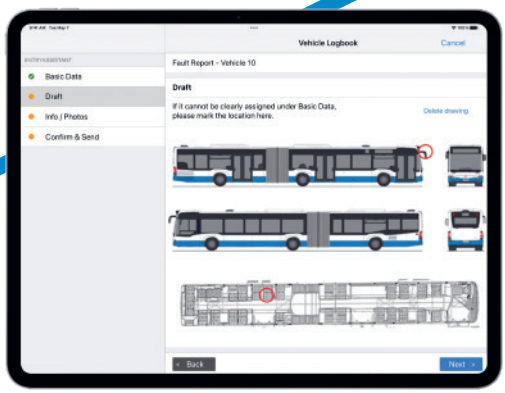

My Service

Clear display of personal duty schedules and routes through direct integration of the planning system (via VDV 452) and dispatching.

Media Module

Content such as documents, text, news, images, video, and audio – all in one place.

Electronic Vehicle Logbook

To simplify communication between maintenance and the employees in the driving service about the vehicle.

Benefit

Operation

- Digital Announcements
- Driving- and duty rosters always up to date
- Informations and instructions by service, line or region

Executive Board

- Direct line to employees for managers
- Quick access to information via news, magazine or video
- Newsfeed on current events, new employees and dates

Control Center

- Always up-to-date driving- and duty rosters incl. instructions for driving service
- Confirmation obligation for clarity, who has not yet read which information
- Reduction in incorrect service entries

Administration

- Direct communication channel to employees in the driving service
- Flexible forms for orders, holiday requests or Incident reports
- Mobile damage and accident assessment on site and post-processing in the office

Maintenance

- Damage reports with sketch and photos directly from the chauffeur
- Electronic logbook with feedback to drivers
- Quick overview of the vehicle condition

Appreciation

- A personal tablet is a sign of appreciation towards employees and is therefore a contemporary argument in the recruitment process

InnoTix

EDB

Idea

- The Electronic Driver Bag (EDB) is your central interface to the driving staff. All relevant information regarding duties, vehicles, detours, routes, and personal details is available in a centralized and organized manner on the tablet, whether online at the depot, at home, or offline on the move.

Benefit

- Service rosters and duty cards are always up-to-date and available in the shortest possible time in case of changes.
- Detours, construction sites, or disruptions are communicated quickly and precisely to the affected personnel. This significantly increases the relevance of the content.
- Operational incidents, such as vehicle breakdowns, can be logged easily and in a structured manner before being forwarded to the relevant departments.

Implementation

- The EDB quickly makes the benefits of digitalization noticeable for everyone involved.
- It enables significant increases in process efficiency and a resulting reduction in costs.
- InnoTix is committed to open interfaces so that systems such as your planning and document management systems can be seamlessly integrated.

What our customers say

"The Electronic Driver Bag is a valuable tool for fostering close contact with driving staff. This not only benefits the drivers, but also reduces the workload for administration."

Vincenz Pietschmann, Project Manager, Dresdner Verkehrsbetriebe AG

"We can't imagine working without the EDB anymore."

Dietmar Schmidt, Head of Driving Services, Erfurter Verkehrsbetriebe AG
