

EDB

**The industry solution for
public transport employees.**

Vehicle Logbook

For the condition assessment of the infrastructure and Q-processes.

Documents

For disseminating professional and operational information (with confirmation function).

News

Important information can be disseminated quickly.

Training calendar

Simple planning of events including training certificates.

Forms

Structured communication with a simple form generator.

Videos

For instructions on troubleshooting or the employee magazine via video.

E-Learning

For memorable, repetitive learning on the go. Learning and exam modes.

Messaging

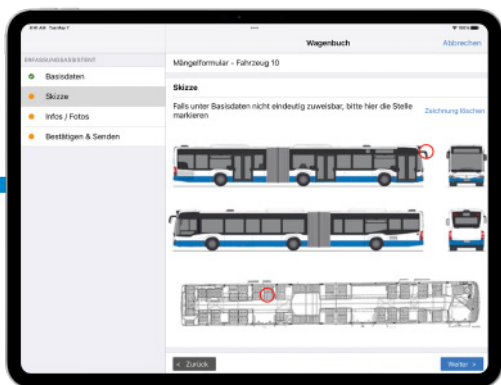

The direct line to the driving service employees enables short messages to be sent instead of e-mails.

References

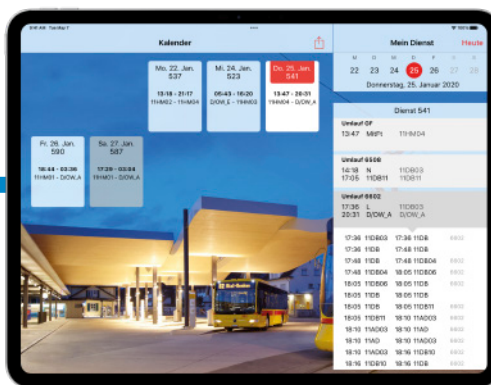

More than **30,000 satisfied drivers** across over **45 operations** in **3 countries** are already using the electronic driver bag every day, including:

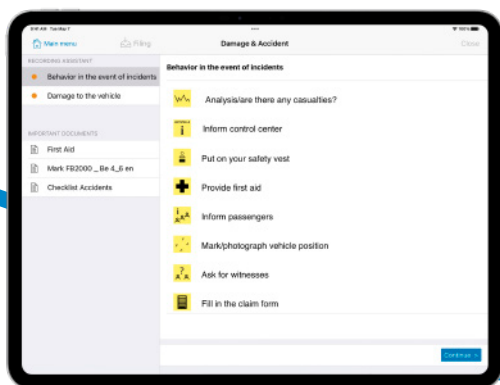

Electronic vehicle logbook

To simplify communication between maintenance and the employees in the driving service about the vehicle.

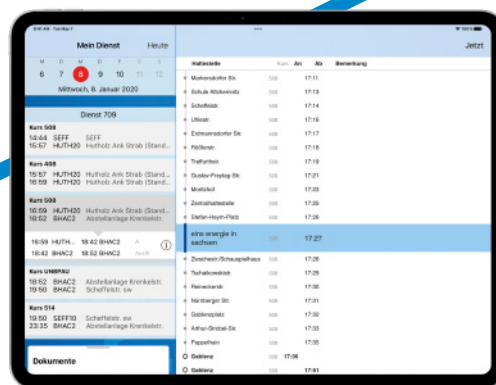

My Service

For displaying the personal duty roster and duty-specific messages, with calendar integration and connection to common planning tools, e.g. via VDV 455.

Accident desk

For rapid recording of an accident situation with clear processes, including reporting to the administration and maintenance departments.

Driving roster

All information about service and route overview at a glance.

Benefit

Operation

- Announcements via digital notice board
- Driving- and duty rosters always up to date
- Informations and instructions by service, line or region

Administration

- Direct communication channel to employees in the driving service
- Flexible forms for orders, holiday requests or uniforms
- Mobile damage and accident assessment on site and post-processing in the office

Executive board

- Direct line to employees for managers
- Quick access to information via news, magazine or video
- Newsfeed on current events, new employees and dates

Maintenance

- Damage reports with sketch and photos directly from the chauffeur
- Electronic logbook with feedback to drivers
- Quick overview of the vehicle condition

Control center

- Always up-to-date driving- and duty rosters incl. instructions for driving service
- Confirmation obligation for clarity, who has not yet read which information
- Reduction in incorrect service entries

Appreciation

- A personal tablet is a sign of appreciation towards employees and is therefore a contemporary argument in the recruitment process.

Idea

- The electronic driver bag is your central interface to the driving staff. All relevant information about duties, vehicles, diversions, routes and personal details is centrally available on the tablet in a structured way. Whether online at the depot, at home or offline on the move.

Benefit

- Service rosters, timetable boards or duty descriptions are always up to date and available on the EDB within a very short time after any changes.
- Diversions, construction sites or disruptions are communicated quickly and specifically to the affected people. This significantly increases the relevance of the information.
- Operational events such as vehicle malfunctions can be recorded easily in a structured way and forwarded to the responsible departments.

Implementation

- The EDB quickly makes the benefits of digitalization tangible for all parties involved.
- It enables significant efficiency improvements in process workflows and thus cost reduction.
- InnoTix is committed to open interfaces so that, for example, your planning and document systems can be integrated easily.

What our customers say

„The electronic driver bag is a valuable tool for managing driver proximity, benefiting both driving personnel and administration.“

Vincenz Pietschmann, Project manager, Dresdner Verkehrsbetriebe AG

„We can't imagine working without the EDB anymore.“

Dietmar Schmidt, Head of Driving Services, Erfurter Verkehrsbetriebe AG
